

## Policy on the Environment, Workplace Health and Safety, and Quality. V.7

The Management at **ESCOFET 1886 S.A.** seals its commitment to the company's customers, staff and shareholders, and to society in general, by publishing this policy, which rests on the following fundamental criteria and principles:

- **E**ffectively implementing continuous improvement in our management system, to enable us to improve the efficiency of our production process and thereby reduce the contamination and consumption of natural resources and minimise workforce health and safety hazards.
- **S**atisfying our customers' requirements by making and selling high-quality products, and by maintaining good relations.
- **C**ommitting ourselves to taking into account environment and workplace health and safety variables when planning and developing all our activities, encouraging awareness of these aspects by the groups concerned.
- **O**ptimising the resources required to meet the objectives and goals set for quality, the environment and health and safety at work, and especially for reducing wastage, emissions, waste disposal, accidents and incidents.
- **F**ostering staff training and the provision of continuous information in order to keep the staff's personal skills up to date, and reinforcing environmental and workplace hazard prevention and staff protection systems.
- **E**stablishing measurable goals and objectives for improvement in the areas of the environment and workplace health and safety, aimed at preventing, controlling and minimising the environmental impact and workplace health and safety hazards resulting from our activities.
- **T**horough compliance with the legislation and regulations on the environment and workplace health and safety, and also with any other commitments the company may decide to embrace.

This Policy, which applies to every aspect of the work of **ESCOFET 1886, S.A.** in general, and in particular to the centres in which that work is pursued, is made known to all the company's staff and also to its suppliers and contractors, so that they may understand it and apply it. It is also made available to the general public.
